

DESD – Real Time Operating System

1. What is RTOS and describe types of RTOS?
2. Difference between GPOS and RTOS?
3. Explain following terms, 1) Interrupt Latency 2) Dispatcher Latency 3) Kernel Response Time
4. Describe RTOS Scheduling mechanism, earliest deadline first, rate monotonic scheduling proportional shared scheduling?
5. What is priority inversion and what is solution to overcome it?
6. What is jiffy?
7. What are differences between RTOS and GPOS?
8. What is the difference between Hard and Soft real-time systems?
9. What is priority inheritance?
10. When should we re-enable the interrupts in an ISR and why?
11. What are Hard & Soft Interrupts?
12. What is difference between Aperiodic and periodic task? Explain RTOS APIs for the same.
13. What is preemptive and non-preemptive scheduling?
14. How to manage Timer hardware in RTOS? Explain RTOS APIs for the same.
15. Explain architecture of any one RTOS in detail.
